

### Farmer owned canola crush facility

Virtex has organized the acquisition of the first farmer owned large scale canola crush facility in North America. This facility will allow producers to profit from the oil content of the seed in addition to the sale of their commodity.

**\$2.25/Bu Premium  
Over The Long Term!**

**Only 20,000 Acres Left  
Available**

Virtex Farm Foods provides producers with the ability to process and sell their own canola oil. By selling canola oil and not just a commodity producers can capture stability and profits uncommon to regular canola production.

As a canola oil producer you can expect:

- "0" Basis
- 50% profit sharing
- Stability of income due to the nature of the oil market
- First call on future production increases
- Special input discounts through our partners

## Growing Clearfield Canola?

It's Time For Your  
Farm to start Selling  
Canola Oil  
and not just a  
commodity

# Farmer Owned, Farmer Controlled

THE BENEFIT OF VALUE ADDED PROCESSING MEANS PROFITABILITY AND STABILITY FOR YOUR CANOLA PRODUCTION.

## NON-GMO, EXPELLER PRESSED, NON-SOLVENT, UNREFINED

- HIGHER NUTRITIONAL VALUE
- FLAVOURFUL AND AROMATIC
- ZERO TRANS FAT
- PREMIUM OVER GMO OILS

The demand for healthier alternatives is growing rapidly; Virtex Farm Foods has seized this opportunity through the acquisition of a NON-GMO canola crush facility in Saskatoon, SK. This facility will be producer owned and controlled paying profits back to its farmer owners. By becoming a part of the Virtex canola crush program producers have the ability to process their own canola into end use oil, taking advantage of the stability and premiums available in the oil market.

## A new direction for Your canola production

### APPLICATION FOR QUOTA

Producers who wish to participate in the Virtex canola crush program can apply to purchase quota. With the purchase of quota producers are entitled to have their canola processed and profit from the sale of oil. With every 40 tonne quota purchase producers receive 500 class A voting shares. This allows producers to control and profit share in the activities at the plant.

### OWNERSHIP PERKS

In addition to receiving oil profits as an owner, producers will also be entitled to unique seed and chemical programming through our supporting partners.

### Clearfield Canola

The Clearfield production system is the most profitable source of Non-GMO canola. The Clearfield system allows for one pass control saving you time in the sprayer. It is also the only system that provides control of flushing weeds.

### Value Added Processing

Our canola crush facility is ready to produce expeller pressed, unrefined, non-solvent canola oil. This oil will be ideal for wholesale to refineries and direct retail as household cooking oil.

### Selling your own oil

Becoming an oil producer means greater stability of income, guaranteed delivery and larger returns.

Its time to become more than just a commodity producer
